**Decorative Concrete/Concrete Restoration
Application and Finishing Tools**

Industrial /Protective & Marine Floor and Surface Coating Tools

Decorative Concrete and Concrete Restoration Application and Finishing Tools

Midwest Rake Company is proud to be one of the “founding fathers” in manufacturing quality tools for those contractors who apply and finish protective industrial and marine floor and surface coatings and those concrete “artisans” who have changed the world of concrete forever with their decorative concrete talents....but, **we serve many more markets with an “exceptional” range of products.**

To review all we are as a company, all we offer and how we choose to do business, please take a look at our **Master Catalog** - either visit us at www.midwestrake.com or call us at 1-800-815-7253 to request a copy.

Crack Filler Squeegees

Push/Pull V-Crack Filler Squeegee

This tool is designed to work as a push or pull squeegee by simply reversing the socket attachment. No tools required. The "V" is at a 70 degree angle, using a 1/4" x 2" neoprene rubber blade. The 2 inch height adds greater containment and control of material.

Push

Pull

Heavy-Duty U-Crack Filler Squeegee

This squeegee is **built for durability**. It has a steel frame with a 5/16" x 2-1/4" neoprene rubber blade. **The 9-1/2" deep by 3" U-shaped cavity holds plenty of material.** Replacement blades are available.

Lightweight U-Crack Filler Squeegee

This squeegee is inexpensive, but effective. It is lightweight, **easy to use and is great for filling cracks prior to applying floor coatings or seal coating material.** Its replaceable blade has an inside width of 2-1/2". The blade height is 1-1/4".

For Handle Options

| MWR Item No. | Description |
|----------------|-------------------------------------|
| 46002 | Lightweight U-Crack Filler Squeegee |
| SP50121 | Replacement Blade (for 46002) |

| SP50120 | Replacement Blade (for 46001) |
| 46005 | Push/Pull V-Crack Filler Squeegee |
| SP50122 | Replacement Blade (for 46005) |

Wire Stripping Brush

This brush has a curved, sander-style handle that comfortably fits the palm and allows the user to press down more firmly when scrubbing. The staggered tufts, instead of rows, provide better coverage and eliminate rake marks. **6-3/4" overall length, 2-1/4" width.**

48037

All-Steel "Heaviest" Duty
Scraper
A "Little Brute"!

- 54" Overall length
- 6 1/2" Replaceable Blade
- Removes tile and the really tough stuff

Solid Steel Head

Scrapers

A stainless steel blade, available in widths of 8", 12" and 16", attached to our super-strong, unique and durable overlapping gusset bracing system along with a 66" powder-coated aluminum handle, make this one of the most powerful scrapers on the market. **Many contractors custom grind the edge to their liking.**

Brushes and Brooms

Steel Wire Brooms

We offer two styles of aggressive steel wire brooms. These brooms are excellent for heavy scrubbing. Choose from either the **16" Round Wire Broom** which comes with a straight (47036) or ergonomic (47026) handle or the most aggressive **12" Flat Wire Broom** which comes with a straight (47035) or ergonomic (47025) handle. All handles are 60" yellow powder-coated aluminum and come with our super-strong, unique gusset bracing system. The heads by themselves are also available. Trim length is 3-3/4" on the round wire and 5" on the flat wire.

Steel Wire Brush (Long Handled)

Spend less time on your knees and less time on a ladder. This 7-1/4" wide brush has 1-1/4" long tempered steel wire bristles and comes with our superior gusset bracing system and a threaded handle adapter (47007), or with a 60" straight (47037) or ergonomic yellow powder-coated aluminum handle (47027).

Bent handles keep more bristles on the surface being swept

Duo Broom *Best for the removal of "fine" materials...*

This broom (82104 - 24"; 82106 - 36") has a highly effective sweeping action because of its combination of strong 3" polypropylene bristles from the General Purpose Broom with an added layer of outside bristles specifically designed to sweep the finest of materials. For maximum strength, this broom comes with our own unique gusset bracing and a 60" ergonomic yellow powder-coated aluminum handle resulting in more broom contact with the surface to be swept. It is available in 24" and 36" widths.

Street/Landscape Broom

Stiff, extra-long bristles make this 18" Street Broom (82118) an excellent choice when you are dealing with rough surfaces. This broom has 5" orange poly-corn bristles and comes with our super strong unique gusset bracing and a 60" ergonomic yellow powder-coated aluminum handle.

See P. 52 in our Master Catalog for all of our Measuring Wheels

A must...

Measuring Wheels

You need to know the surface area first... it's just that simple.

Before you start... Spiked Shoes ...are a must!

For walking on and in applied materials during the application and finishing processes. Standard rigid platform and "flexible" shoes are available. Spike lengths are available in lengths of 1/2" to 1". Don't leave home without 'em!

"Flexible Bed" Spiked Shoes

made for Midwest Rake Co. by 

Original Tip Spikes are available for use with High Performance Floor Coatings

- **Revolutionary** - perfect fit, balance and flexibility
- **The safest spiked shoes available**
- **Toe and heel guards**
- **Snap-lock buckle system**
- **1/2" spike length**
- **20 replaceable spikes per shoe (18 per shoe on size small)**
- **Fits like a shoe**

The "Epoxy" shoe

All spiked shoes come with a durable snap-lock buckle system

"safety" first...

Application Squeegees

1 Choose the frame

EXCLUSIVE

Midwest Rake Company application squeegee frames are the standard in the Protective Coating industry. These "clamp-style" frames make it easy to change blades. The unique gusset bracing and threaded handle adapter are the most durable on the market. The solvent-resistant aluminum frames are available with a powder-coated aluminum handle in a 66" or 82" length or with a threaded handle adapter. These are quality frames that can be used over and over again, requiring only the purchase of replacement blades (see below).

| Description | Frame Width | | | | |
|--|--------------|--------------|--------------|--------------|--------------|
| | Item No. 16" | Item No. 24" | Item No. 30" | Item No. 36" | Item No. 48" |
| Application Squeegee Frame with THA* | 78000 | 78010 | 78015 | 78020 | 78040 |
| Application Squeegee Frame with 66" PCAH** | 78100 | 78110 | 78115 | 78120 | 78140 |
| Application Squeegee Frame with 82" PCAH** | 78200 | 78210 | 78215 | 78220 | 78240 |

Helpful Hint...

So how thick is 10 mils...or 20 mils? A lot thinner than most people think. 10 mils is the thickness of an average business card. An 1/8" slurry is 125 mils..."It's a thin world after all".

No squeegee blade or blade manufacturer can guarantee a final mil thickness (or thinness)...there are just too many factors that influence final coating thickness. Ask the technical specialist of any coating manufacturer, then use a "gauge" along the way.

2 Choose the blade

Midwest Rake Company application squeegee blades are available in Neoprene, EPDM and Red Rubber. The **Neoprene** and **EPDM** blades are "reversible" (notched on both sides). The **Red Rubber** blades are notched on one side and no-notch (flat) on the other side. Each type is available in a variety of head widths and notch sizes. Neoprene blades are best for water-based or oil and petroleum based coating products. EPDM blades are best for solvent-based coatings and clear coats. The 2" Red Rubber blades are solvent-resistant and offer more flexibility in any floor coating application use. They are "non-marking" and display good solvent tolerance.

Neoprene

EPDM

Red Rubber

EXCLUSIVE
Rubber is also available by the roll.

Our standard Neoprene, EPDM and Red Rubber is available in 25' rolls. Please see the chart below for product information.

| Description | Standard Neoprene | Standard EPDM | 2" Red Rubber |

Durable threaded handle adapter

Hand-Held Squeegee

EXCLUSIVE

You can go back again and again to the hardware store or home center to buy window squeegees, or you can just change the 8" wide blade in this quality built, hand-held squeegee. It is used to fill depressions and cracks in a floor prior to the application of any protective coating product. You can also use it to spread any material, including slurries and highly viscous and cementitious mixes. **It comes with a choice of a 3" flexible rounded edge neoprene blade (78708), or a 1-1/2" more rigid square edge neoprene blade (78709).** The blade is clamped in a durable 11" long x 8" wide aluminum frame, not bolted through, making it easy to replace. The handle is a 6" non-slip vinyl grip over an aluminum core.

78708

OK, for those of you who are still not convinced or just plain lack any sense of adventure...here it is...a 10" hand-held window squeegee. Blade is replaceable (SP50130).

78710

Want a different blade? Well, buy any option of our 16" squeegee blades on page 6, cut it in half...and you've got a new blade and a spare.

Flexible Radius Squeegee/Trowel

This highly versatile, **solvent-resistant rubber hand tool** (may be used with a handle, see page 10) with flexible wings is **ideal for the application of higher viscosity waterproofing, floor coating and sealing materials and along floor edges, for crack and patch filling on floors, and for the creation of a rounded radius along straight and radial edges when applying many different cementitious materials such as epoxy patching mortar on floors.** The wing width is 6-1/2" and the length is 9-1/2". A 1" diameter handle may be used with this tool.

46010

CAM® Gauge Rakes

"An American Classic..."

A patented "goof-proof" tool which applies a range of materials at a precise, specified, and uniform depth. For use in applying decorative concrete "toppings," self leveling/high performance floor coating materials, and underlayments in the floor-covering markets. CAM® depth settings range from 1/32" to 1-1/2". A must have tool for the decorative concrete and floor coating contractor. The CAM® Gauge Rake is comprised of an aluminum frame that comes with either a threaded handle adapter or a powder-coated aluminum handle. **Choose your frame size and handle option and then choose your CAM® set (set of 2).** When one contact point wears down, you simply loosen the wing nut and rotate the CAM® to a fresh contact point. We use a "radial" edge design which maintains uniform coating thickness, even at varying handle angles and lengths.

CAM® Gauge Rake Frames and CAM® Sets are sold separately

CAM® Gauge Rake Frames

EXCLUSIVE

- Head widths range from 10" (hand held) to 48". The 24" and 36" widths are the most popular. CAM® sets come in depth settings ranging from 1/32" to 1-1/2" with the 1/8", 1/4", and 3/8" CAM® sets being the most popular.
- Each CAM® has multiple contact points of the same depth... when worn down, loosen the wing nut and rotate the CAM® for a fresh contact point of the same depth setting.
- The CAM® Gauge Rake is available with a milled threaded handle adapter or a 66" powder-coated aluminum handle. The 10" CAM® Rake is used for small areas and counter tops and has its own fixed handle with grip.

Helpful Hint...
In many applications, gauge rakes can do the work in half the time it takes to use a squeegee...and with greater precision.

*Threaded Handle Adapter

"Sled" Style Gauge Rakes

These **self-adjusting** gauge rakes have been used for many years. Although not as precise as our other gauge rakes shown, they are **value priced**, will allow you to achieve a reasonably level depth when installing more cementitious materials, and **do allow you to more easily move over rougher surfaces.** **Styles and colors may vary, but the "sled-style" self-adjusting features of these gauge rakes will be "standard" characteristics of anything available in this category...and our handle adapter is "threaded".**

Wire Gauge Rakes

EXCLUSIVE

58624

Radial contact points for a smoother push/pull action

58609

The **Wire Gauge Rake** is used to apply self-leveling floor coatings and lower viscosity materials. It is far superior to pin-type gauge rakes on the market. **The strong spring-steel wires are formed in a "radial" or loop fashion. This eliminates chatter and vibration common with pin-type gauge rakes. The multiple contact points make this tool an excellent choice when working on pitted or uneven surfaces, as some of the points will maintain the desired level or depth of application even at varying handle angles and lengths.** The adjustable aluminum gate or bar can be set to any desired thickness from 0" to 5/8". Replacement wires are available. **Ordering replacement wire sets is encouraged.**

Handle Options

Powder-Coated Aluminum Handles with Milled Threaded Tips - for use with threaded handle adapters. **We designed this milled threaded tip handle to provide the "tightest" fit with our tools that are available with our exclusive threaded handle adapter.** These handles have a durable, milled threaded aluminum tip for added strength - no more broken tips - and come in 60", 66", and 82" lengths. We also have a 60" extension handle available to use with these handles which **has a threaded tip on one end and a threaded receptacle on the other end.**

Fiberglass Extension Handle

EXCLUSIVE

This fiberglass, double-lock, telescopic handle extends from 3 to 6 feet. It has a milled threaded tip that is virtually unbreakable.

Application Brushes

Block size
6" x 1-3/4"

48035

Epoxy/Thick Fluid Coating Brush

This 13" hand-held brush has 3-1/2" tampico bristles that are strong and chemical resistant. This brush provides fast, thorough coverage of all materials ranging from epoxies and water-proofing to base coat and roofing materials. It is ideal for applications in tight places or for any quick coating needs.

Protective Coating Brush

Polypropylene bristles in combination with a squeegee blade make this an ideal protective coating application tool when applying a range of products when coverage is more important than a specific mil thickness. This tool is used extensively when resurfacing asphalt surfaces such as driveways, when coating garage floors, work areas and when applying waterproofing and roofing materials...an excellent DIY tool, as well. Braces are available below and we recommend using this tool with our hardwood handle with metal threaded tip (SP20215 or SP20216 - see page 10.)

Roller Covers

Premium Roller Covers

These roller covers are available in a shed-resistant woven mohair-blend or a shed-resistant woven fabric in 9" and 18" widths with various nap lengths. Please see the chart below for details.

Pro-Grade Roller Covers

These roller covers are available in a shed-resistant woven fabric in 9" and 18" widths and in extra long widths of 24" and 36"; with various nap lengths. These rollers are sold individually and in 12-Packs. Please see the chart below for more details.

Helpful Hint...

No roller cover is 100% shed resistant...we suggest running tape over the roller cover prior to application.

1/4" Holed End Caps

Please Note: Only our "Premium" 18" roller covers come with end caps. All other roller covers come without end caps.

Specialty Roller Covers

These **Grey Carpet Nap Roller Covers** are for the application of adhesives and coatings.

These **Looped Polymer Roller Covers** are most often used to "back-roll" applied coatings. Color may vary.

Our **Phenolic Roller Covers** are solvent-resistant and are used for the spreading and leveling of applied epoxies and mastics, anti-slip floor coverings and heavier coatings.

These **shed-resistant 1/4" nap Epoxy Coating Roller Covers** exhibit great pick up, release and even flow capabilities. This cover resists both matting and drag. The extra thick polypropylene core resists water, solvents and cracking.

Roller Frames

9" Universal Roller Frame

This frame is for 9" rollers and has a quick release spring that prevents roller slippage, smooth bearings for reliable applications, a polypropylene grip and a threaded handle adapter. It is one of the best universal roller frames on the market.

48100

9" Economy Universal Roller Frame

This traditional "paint roller" style frame is for use with any 9" roller cover. The handle contains a threaded handle adapter.

48105

9" - 18" Adjustable Roller Frame ...*simply the best*

This frame adjusts to hold all roller covers from 9" to 18" wide. It has a rigid and durable steel frame with a threaded handle adapter, yet weighs less than one pound. This is the best adjustable roller frame available. Any roller used with this frame needs end caps. (see page 11)

48110

18" Non-Adjustable Roller Frame

This lightweight, yet durable polypropylene 18" non-adjustable frame can accommodate any of the 18" roller covers we offer. This frame offers a threaded handle adapter and the fiberglass-reinforced nylon legs are replaceable. Any roller used with this frame needs end caps. (see page 11)

48118

Set of 2 Replaceable Legs - SA30006

Heavy-Duty Fixed Aluminum Frames

These are the most durable frames on the market. **They are available in widths of 9", 18", 24" and 36"** and can be used with any of our roller covers. Our own design, it is the same frame used with our spiked and aluminum rollers. The frames can be ordered with either a threaded handle adapter or with a fixed handle assembly. These heavy-duty solid aluminum frames are solvent-resistant and can be easily cleaned after each use. **Special 3/8" post hole end caps are available for use with these exclusive frames when using 9"-36" roller covers. These polypropylene end caps are used to adapt the frames to any 1-1/2" roller. They are sold in quantities of 1 pair or a bag of 24.**

*Powder-Coated Aluminum Handle

Ribbed Rollers

...a traditional tank-lining tool...with many other creative uses

Ribbed rollers are used to evenly distribute resin and other bonding materials when installing fiberglass and other high performance fabric and mesh laminate reinforcement systems. The use of these rollers enhances the fiberglass/fabric saturation and containment, while removing air bubbles and pockets. **These rollers are useful in the installation of tank linings, concrete secondary containment systems and concrete mortar laminate reinforcement flooring applications.** Aluminum rollers are the industry standard. All styles have fins designed with just enough angle to increase strength without sacrificing air relief. These rollers are designed to reduce sheared fiber by insuring a radius is machined on each fin. Resin can be burned off with a torch.

Replaceable Sleeve Ribbed Rollers

These aluminum rollers fit directly on standard paint roller frames. They have a 2" diameter with a 1.5" diameter center to slip over paint roller frames just like a paint roller cover. The rollers are made from strong 6063 aluminum and are machined to exacting standards of the 2" aluminum rollers shown below. They are sold as complete tools, with replacement sleeves available.

| MWR Item No. | Description |
|--------------|--|
| 48334 | 4" Aluminum Ribbed Roller, 2" Diameter, Paint Frame - Complete Tool |

| 48127 | 7" Heavy-Duty Roller Frame with Threaded Handle Adapter |
| 48129 | 9" Heavy-Duty Roller Frame with Threaded Handle Adapter |

Ribbed Rollers with Wooden Handles

These aluminum rollers have a traditional deep fin, straight groove design. Machined radius fin corners reduce glass fiber shearing. They have reduced clearance for less resin contamination. These rollers come on strong galvanized steel frames with undersize handle bore for tight fit and long life. The wood handles are steel ferruled and accept standard threaded extension handles (see page 10).

| MWR Item No. | Description |
|--------------|--|
| 48313 | 3" Aluminum Ribbed Roller, 1" Diameter, Wood Handle - Complete Tool |
| 48316 | 6" Aluminum Ribbed Roller, 1" Diameter, Wood Handle - Complete Tool |
| 48326 | 6" Aluminum Ribbed Roller, 2" Diameter, Wood Handle - Complete Tool |
| 48329 | 9" Aluminum Ribbed Roller, 2" Diameter, Wood Handle - Complete Tool |

Specialty Ribbed Rollers

These specialty rollers are designed for concave surfaces and filets where flat rollers are not effective. All of these rollers come with strong steel frames and ferrule reinforced wood handles with handle adapters that accept standard extension handles (see page 10 for handles). All of these rollers are machined with the deepest fins possible for efficient air relief and excellent lay up properties.

| MWR Item No. | Description |
|--------------|--|
| 48321 | 3/4" Aluminum Corner Filet Ribbed Roller, 2-1/2" Diameter - Complete Tool |
| 48323 | 3" Aluminum Barrel Radius Ribbed Roller, 2" Diameter - Complete Tool |
| 48310 | 3" Aluminum Inverted Radius Ribbed Roller, 1" Diameter - Complete Tool |

Fiberglass Scissors

These 10" Knife-Edge Fiberglass Scissors are very rigid and American Made. The knife edge design insures clean, crisp shearing action for all fiberglass materials. **The increased blade angle of 45° over the 15° angle of standard scissors reduces effort and leaves a cleaner, more even cut.**

48300

Spiked Rollers

We are one of the very few manufacturers in the world to offer **rigid solvent-resistant and aluminum cored polypropylene spiked rollers for the floor coating industry.**

These spiked rollers are vital in ensuring proper floor coating material adhesion. They are designed to be used on freshly applied floor coatings for the purpose of releasing trapped gas as well as to assist in the leveling process of several varieties of floor coatings. These rollers are easy to clean, allowing for repeated use. The applicator should also wear spiked shoes while using a spiked roller (see page 5).

We manufacture our spikes and end caps out of solvent-resistant High-Density (HD) and Ultra-High Molecular Weight (UHMW) Polyethylene, respectively, for easier cleanup and extended wear. We're sure you will find these tools worth cleaning! Spikes are available in 7/16", 9/16" and 13/16" lengths. Our most popular widths are 9", 18" and 24". Our rollers also come in 36" and 48" widths, which are preferred by some applicators when very large, flat areas need to be treated quickly. We also have 1-1/2" and 3" widths on special frames for very tight areas. Each of our rollers 9" or wider, comes with a heavy-duty aluminum frame and high-grade stainless steel axles and our superior gusset bracing with a maximum strength threaded handle adapter. Our 9" rollers come on a special radial frame with a threaded handle adapter. The 1-1/2" and 3" rollers come on special handled frames. (Standard "paint-roller" frames do not work with our 9" Spiked Rollers). Replacement rollers for all width and spike lengths are available as replacement frame assemblies (see page 12).

- 1-1/2" with 7/16" spikes - 59001
- 3" with 7/16" spikes - 59003
- 3" with 9/16" spikes - 59403
- 3" with 13/16" spikes - 59103

59009

Our Spiked Rollers are constructed by stacking solvent-resistant, interlocking rings of spikes around an aluminum core.

Helpful Hints...

Many factors can contribute to the creation of trapped gas bubbles in freshly applied protective coatings, particularly on floors. Our 7/16" and 13/16" Super Sharp Spiked Rollers are effectively used on most floor coatings and **your choice between the two depends on the mil thickness specifications of the material being applied.**

Where a great abundance of bubbles are anticipated or seen, our 9/16" Super Sharp Spiked Rollers are ideal because of the greater number of spikes per square inch of roller surface.

Most often, either the 7/16" or the 13/16" Super Sharp Spiked Rollers are adequate to get the job done.

"Metal-Tined" Spiked Roller Covers

A more dense steel tine configuration, modeled after the traditional "porcupine" roller. These rollers have a phenolic core. The 18" cover comes with 1/4" holed end caps.

| Description | Item No. 9" NO END CAPS | Item No. 18" WITH END CAPS |
|---------------------------------|----------------------------|-------------------------------|
| Metal-Tined Spiked Roller Cover | 48090 | 48091 |

For Frame Options see page 12

Back-Rolling Covers

These rollers are preferred for "back-rolling"; the finishing of applied floor coatings after the initial application.

Blunt Spiked & Stub Rollers

We make a number of specialty tools featuring these hybrid spikes. Unlike our sharp-tipped spiked rollers, used to remove trapped bubbles from freshly applied floor coatings, these roller covers are actually used as application tools. They are often used to force and compress aggregate materials into a variety of overlayers, or create a special surface finish. We can custom make a variety of tools using the "blunt" and "stub" spikes...and because of the hollow aluminum core, these rollers can be weighted.

| 47162 | 30" Speed Squeegee with 3/16" Notch Blade |
| 47163 | 30" Speed Squeegee with 1/4" Notch Blade |

Flexible Blade Smoother

This flexible 24" x 5" rounded corner steel blade is bent and angled to maximize blade contact with a range of surface coating materials. This smoothing tool can also serve as a spreading tool and even a surface preparation tool. It is most often used when troweling and/or smoothing overlay/underlay material (toppings) of a more cementitious composition prior to surface treatment. The blade is contained in a durable aluminum frame with our superior gusset bracing system. This tool is available with a threaded handle adapter or with a 66" powder-coated aluminum handle. Square cornered blades are also available, please call for information.

Smoother/Spreader

This tool is lightweight, yet durable. It features a 22" frame with a 23-1/2" x 2" heat-treated steel blade, fan-shaped for next to wall coverage, and a reversible "threaded" handle adapter assembly allowing for use as a smoother or spreader. Spread material with the blade in a vertical position (see below). Flip the tool over and smooth the surface as shown.

This is a "core" tool...

See handle options on page 10 Use #SP20215 (wood) or aluminum powder-coated handle.

Long handled "troweling" action, too...

Topping and Underlayment "Super Squeegee"

A 24" low-angle/clamp style frame with a durable gusset bracing system is combined with a rounded edge, 3" exposed neoprene rubber blade. The result is a tool that effectively eliminates the need for troweling. A true spreading and smoothing squeegee allowing the contractor opportunity to save time and money when working with "toppings", underlayments and "high-mil" self-leveling materials. The contractor-friendly head to handle to surface angle has made this a very effective and popular tool.

3" Neoprene Rubber Blade

Weight bars

1/8" Stubs

70206

This 24" **Double Roller** configuration is available with stub rollers or with smooth aluminum rollers and **both have adjustable weight capability**. The stub double rollers are used for terrazzo and high-build impregnated flooring systems to ensure the aggregates are thoroughly placed and evenly distributed throughout the floor. The aluminum double rollers are used for polymer flooring systems to ensure the filler

(aggregate, paint flakes, vinyl chips, metallic filler) is uniformly and fully saturated into the wet polymer matrix.

We recommend using these rollers with our fixed 66" powder-coated aluminum handle for maximum strength. **The roller hubs have ball bearings and stainless steel axles and come in a heavy-duty, powder-coated steel frame which provides easy adjustment of weight load, allowing for the increase or decrease in downward pressure.** The **Edger** comes with stub spikes and works right along with the Stub Double Roller, fitting into tight areas and along walls where the double roller cannot be used effectively. It comes with a rigid steel frame and axle which is weighted. It comes with a threaded handle adapter or with a 66" powder-coated aluminum handle.

Low Viscosity Mixers

The **Pro-Grade** mixers are the choice of many contractors. **These mixers have low shear for minimal air entrapment while mixing.** The Pro-Grade mixers are constructed of quality powder-coated steel and are available in 2 sizes; a 1-2 gallon paddle with a 3-1/2" turbine style head on a 19-3/4" x 5/16" diameter hex shaft or a 2-5 gallon paddle with a 4-3/4" turbine style head on a 23-1/2" x 3/8" diameter hex shaft.

Jiffy Mixers are also available in two sizes; a 1-2 gallon and a 2-5 gallon. the mixers are made of 304 stainless steel and fit all 1/4" - 3/4" chucked power tools. **The blade actions are characterized by a smooth, thorough, non-air sucking and non-splashing action.**

High Viscosity Mixing Paddles

These mixers are used by those in the decorative concrete, stamping and terrazzo markets. The "football" shaped cage configurations are ideal for mixing more viscous "topping" and cementitious materials. The **larger 10" x 6" head** is designed for barrel mixing. The **smaller 6" x 4" head** is ideal for 5 gallon quantities. Both mixers effectively remove air without splash-out. Both have an overall length of 26" with a hex shaft.

15 Gallon Mixing Barrel

Mixing barrels can be hard to come by...reconditioned or new. The 15 gallon mixing barrel (European style) with fixed side handles and sealing lid is the standard. Used to mix more cementitious materials prior to application.

Please call 1-800-815-7253 for availability and pricing.

- HD Polyethylene
- Belted lids
- Web or pegged handles

(Features of the reconditioned barrels may vary)

Level Pegs

Stick-Ems™ Level Pegs are used to achieve a level surface. Use them with your leveling unit. **Cut to height and stick this flexible, self-adhesive rubber/vinyl peg right to the substrate.** Pour leveling product right over the top.

The peg will not float to the surface and becomes part of the cement matrix. Gauged in millimeters up to 65 mm (2-1/2").

| Stick-Ems™ Level Pegs | 46280 |

In-Store Display Unit

This "In-Store Display Unit" is a three-sided, free-standing unit comprised of three 2' x 8' black wire grid panels. This unit can be placed against a wall, used as an end-of-aisle display or as a free standing unit. **The unit does not come with tools; you can customize the unit with the tools your customers want and need.**

You customize the unit with tools to meet your customers' needs...

Unit includes:

- 3 - 2' x 8' black wire grid panels
- 3-Coating Application Tools signs
- 24-4" hooks
- 14-8" hooks
- 2-Literature baskets
- 30-Cable ties
- 25-Catalogs
